Vril or Vri-il refers also to a non defined form of mystical energy often linked to Orgone energy as described by Wilhelm Reich. The bands intuitions have lead them to believe that life is but a long oniric experience modified by the will of the dreamer. Vri-ils live performance tends to create an hypnagogic environment in which one can lose touch with his conscious self and reach different states of creativity. This is achived through hypnotic rythms, tones repetition and frequency modulations. With the proper attention the listener can reach an estatic condition and hear the infinity of sounds within a single sound. This link them to ancient music traditions and to the modern ipnotic performances such as those of The Theatre of Eternal Music of La Monte Young. Vri-il has played various concerts all around Italy, two special concerts, wich actually were two 6 hours celebrations of spring equinox and summer solstice during 2004, were recorded and released on CD by MCL (Musica di un certo livello), an independent italian label. Their first album was completed in summer 2004 and released in early 2005 by MCL and Misty Circle, an historical experimental and industrial label based in Rome.
